Shelf

C 4 ea
Long vertical tube

D 4 ea
Vertical tube with bungee cord

E 2 ea
Hanging rod

F 1 ea
Cover

G 1 ea
Top support

Assembly Time:
Less than 1 hour.

This product's intended use is for hanging garments and storage.

Tools Needed: No tools required.

Note: All metal parts must be inserted firmly and completely into the plastic parts.

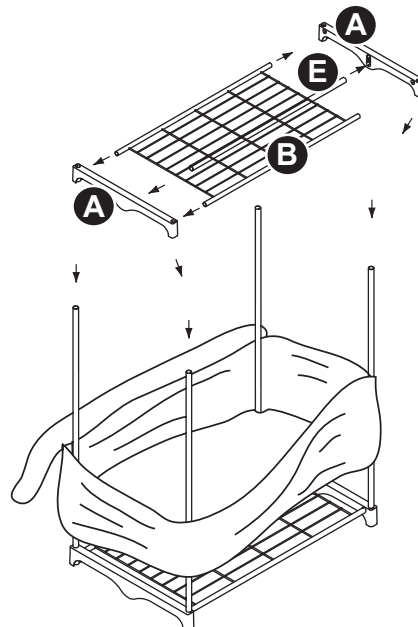

STEP 1. To assemble the lower frame, insert one shelf (B) into two corner supports (A). Insert four long vertical frame tubes (C) into holes in top of corner support.

Note: For easier assembly, unzip cover before installing.

STEP 2. Unzip zipper on cover (F) and carefully fit holes in bottom of cover over the long vertical frame tubes. Slide cover down and carefully lay the cover back.

STEP 3. To assemble the middle shelf, insert another shelf (B) and one hanging rod (E) into two more corner supports (A). Insert assembled middle shelf onto top of long vertical frame tubes.

STEP 4. Insert vertical tubes with bungee cord (D) into top of corner connectors of middle shelf. To assemble the top shelf, repeat step 3. Insert assembled shelf onto top of tubes (D). Place top shelf pad (G) onto assembled top shelf.

Note: Although your clothes closet can be assembled by one person, it is recommended that two people install the cover.

STEP 5. Lift cover (F) up over the top of the frame, carefully fitting the corners of the cover over the top corners of the frame. Make sure top shelf pad (G) stays in place while cover is fitted. Slide the bottom of the cover downwards evenly to the base of the frame.

STEP 6. To secure cover at the bottom, hook bungee loops around feet of closet in front.

Note: If you want to keep the front flap open, use the three toggles on the back seam right side as illustrated below.

NOTICE:
Do not move unit that is fully loaded. Unit is designed for stationary use only.
