WASHING DELICATES

PREPARE

Turn item inside out and treat underarms, collar, cuffs and any stained area with Stain Solution. Apply directly to the fabric and work in with a finger or Stain Brush. Soak tough stains in cool water for up to 30 minutes.

HANDWASH

Fill a wash basin or sink with cool water and add 2 capfuls or a squirt of Delicate Wash. Soak for up to 30 minutes.

Run cool water through item until rinse water is no longer soapy. Do not wring. Instead press the item against the sink or basin to remove the water.

Note: If there is color in the water, don’t worry! This is normal and is simply the yarn releasing color. You will not notice any loss of color in the end.

MACHINE WASH

Insert item into a Mesh Bag. Select the Delicates or Handwash cycle and cold water. For a small load, add 2 capfuls of Delicate Wash. For a full load, follow instructions on the bottle.

Remove promptly after washing.

DRY

Lay flat in its natural shape. Place the item on top of a flat drying rack or hang to dry. Do not put in the dryer!

Steam while damp to remove wrinkles and rejuvenate the fabric’s natural luster.

Note: While silk is washable, it’s important to note that this fabric commonly bleeds and can potentially stain other items in the wash. If a single garment consists of two or more colors, bleeding may also occur. Always test for color bleeding before washing. Smooth finishes may be be textured after washing.

All techniques are based on textile science. Not all garments perform and react as science would predict.
