

HOW DO I SET THE CODE ON MY LOCK?

1. Remove the red packing arrow on the lock if your case has one.
2. The case is set to 0-0-0 at the factory. Choose your own 3 digits which you can easily recall (birthday, address, etc.).
3. Locate the button or lever adjacent to the dials:
 - If there is a button, push it towards the dial and hold while you rotate the dials to your desired setting, then release the button.
 - If there is a lever, move the lever to its lower position (some move to the right and up), rotate the dials to your desired setting, and then return the lever to its original position. Your combination is now set to your 3-digit code.
